ABSTRACT

Asymptomatic bacteriuria among pregnant women

Read by QxMD

April 21st, 2018 - BACKGROUND Asymptomatic bacteriuria is the significant presence of bacteria in the urine of an individual without symptoms. In pregnancy, the apparent reduction in immunity of pregnant women tends to encourage the growth of pathogens. AIM This study was carried out to determine the prevalence of asymptomatic bacteriuria among pregnant women.

May 2nd, 2018 - ABSTRACT Objective to determine the prevalence of asymptomatic bacteriuria in pregnant women and antimicrobial susceptibility pattern of pathogens isolated and also to determine the relationship between asymptomatic bacteriuria and pyuria.

January 27th, 2017 - AIM This study was carried out to determine the prevalence of asymptomatic bacteriuria in pregnant women attending a primary health centre in Benin City, Nigeria.
