June 5th, 2020 - mokume gane is a Japanese metalworking process that uses colored mixed metals to produce a distinctive pattern. Mokume gane roughly translates to wood grain metal alluding to the wood grain like look of the finished blade. The metals used in mokume gane are nonreactive metals typically nickel silver, copper, and brass.

June 4th, 2020 - Mokume gane is an old Japanese technique for creating patterned and colored finishes. The Japanese words literally translate as eye of the wood grain metal. Modern jewelers and silversmiths have adopted and modified this traditional technique to produce stunning finishes for their work, which have received worldwide acclaim.
